

Rob Hammond

Managing Director

Areas of Expertise	Project, Programme and Contract Management
Industries	ICT, Construction, Infrastructure
Qualifications	Bachelor of Agricultural Economics (Honours) Project Management Institute PMP Certified (lapsed) Graduate of the Australian Institute of Company Directors GAICD)
Memberships	Australian Institute of Project Management (AIPM) Australian Institute of Company Directors (AICD) Project Management Institute (PMI)

Key Experiences

Rob joined TBH in 1995 and has specialised in the provision of project management and project controls services across a number of sectors including ICT, construction and infrastructure. He is an expert in project controls and planning for large scale, complex or high risk projects. Rob became a director in 2005 and was appointed managing director in 2012.

Rob has developed an understanding of the importance of clear, precise reporting techniques aimed at developing a definition of scope, need and responsibility of the actions defined by a program. His ability to work in a team environment employing both analytical and complex problem-solving skills is second to none.

Rob has served on the board of PMI Sydney Chapter over a number of years and is an active member of AIPM and AICD. He has presented papers to these organisations over the years.

Rob's work at TBH includes:.

Planning and Forecasting (time, cost and resource)

- Development of detailed master integrated project schedules to model key logical interdependencies for major infrastructure projects
- Senior executive planning and advisory roles with a focus on commercial 'what if' analysis
- Introduction of advanced project management quantitative measures such as earned value, critical chain and quadratic programming to enhance decision making by senior management

Claims Preparation and Advice

- Provision of advice to executive stakeholders as to commercial strategy in negotiation and dispute situations
- Preparation and analysis of claims for time extensions, prolongation, disruption, acceleration and loss of productivity impact from time and cost perspective

Project Review and Audit

- Forensic review of project progress and key factors limiting successful execution
- Development and implementation of project recovery plans and facilitation of executive level engagement
- Review of adherence to corporate and industry recognised project management methodologies and consequential remediation initiatives
- Led Post Implementation Review teams to capture lessons learnt and continuous improvement

Project Management

- Management of cost, schedule and resources to ensure successful delivery in fixed price engagements
- Establishment/ enhancement of Project Management Offices in diverse range of environments and industries
- Advisory services for enterprise project management systems assessment and integration
- Project portfolio modelling and optimisation for executive level management audiences
