

Meiske SOMPIE

Director

Areas of Expertise Project Management & Programming

Industries ICT, Construction & Infrastructure, Defence, Space

Qualifications
Bachelor of Engineering (Civil)
Master of Construction Management
PMI Scheduling Professional
P3O Practitioner
Agile Scrum Master Certified

Security Clearance Negative Vetting 1 (NV1) Australian Government Security Vetting Agency (AGSVA)

Key Experiences

Meiske joined TBH in 2000 and became a Director in 2011. She has gained a wealth of technical knowledge and experience while specialising in the provision of project, program, and portfolio management services and programming/planning across several industries including ICT, business transformation, construction, defence and infrastructure upgrades. Utilising her expertise, Meiske is able to provide high level strategic advice on project delivery and governance.

Meiske is involved in billion-dollar projects and has managed a program of works of up to 200 projects, focusing on scope, time, resource, dependency and risk management. She has a sound knowledge of PMO and change management and understands all the key components involved in delivering a successful project, program, and portfolio.

Meiske has a good understanding of the differing nature and constraints of projects both nationally and internationally. She has a vast knowledge of the different types of projects ranging from government to private sector.

Meiske has developed an understanding of the importance of clear, precise reporting techniques aimed at developing a definition of scope, need and responsibility of the actions defined by a program. Her ability to work in a team environment employing both analytical and complex problem-solving skills is second to none.

Meiske is highly skilled in the use of mainstream scheduling software and P3M toolset. She has significant experience in the development of highly evolved spreadsheet models for scenario analysis and risk management purposes as well as designing dynamic and automated project reporting solutions.

Meiske's work at TBH includes:

Project Planning and Scheduling

- Experience in the preparation of detailed schedules in ICT and construction projects
- Development of reporting systems, processes and templates for progress reporting of complex multi stakeholder projects throughout all project phases (initiation to customer acceptance)
- Development of resource planning and forecasting tools using project schedules
- Expert in critical path analysis and early warning of potential delays and provision of project recovery recommendations
- Management and maintenance of project schedules and project reports which focus on project's progress and deliverables management

Strategic Advice

- Non-invasive data gathering and analysis process which evaluate overall health or risk profile of a project
- Assess performance against business objectives, provide recommendations for improvement and implement actions for project recovery or rescue

PMO Services

- Design and implementation of an effective organizational model to support project delivery
- Governance of processes (including risk/issue, change management, and documentation management) and project quality to ensure project success criteria are achieved
- Maturity analysis and continuous improvement plan
